Options	Facts	Details
Metrologically approved as per OIML R 87	Prepack regulations (FPV) control, verifiable only for weighing belt lengths from 150 mm to 400 mm	The checkweighers are metrologically approved as per accuracy class XIII (1) and therefore suitable for prepack regulations control.
Metal detector	integrated metal detector	The metal detector is operated from the display of the checkweigher.
	Metal detector belt length	750 mm
Operating panel	7" color display with membrane keyboard	WVGA (800x480)
Indexing belt length	150, 200, 250, 325, 400, 500, 600, 750 mm	Shaft distance
Rejection systems	Air-jet nozzle	Further rejection systems upon request as a project
	Pusher	
Reject bin	Stainless steel	
	Dimensions (L x D x H)	150 200 300 400 x 300 x 750 mm, Opening: 200 mm
		250 350 500 x 310 410 x 750 mm, Opening: 250 mm
	Container fill level check	Light sensor
	Ejection monitoring	1 light sensor or 4 light sensors
	Lock for reject bin	available as latch or lock
	Door monitoring	stops the system when the reject bin door is open after expiration of an adjustable time
Protocol printer	Mounted to control cabinet	Incl. license LINE_PRINTER and serial interface
Emergency stop	Emergency stop with belt switch-off	mounted to main column, turns off conveyor drives
	Emergency stop with pneumatic system and belt switch-off	additionally switches off the pneumatic system
Signal lamp	2-color	Red = fault, green = device okay
	3-color	Red = fault, yellow = stop, green = belts running
Emergency operation function	The conveyor belts of the checkweighers can be started manually even if the operating and control unit failed.	The belts run in order to ensure the production flow (without weighing function). Operation via extra module in the control cabinet with adjustable belt speeds.
Tendency control kit	Incl. license Tendency Control and relay	
Line integration kit	3 outputs via relay and 1 input	
Flow control	Light sensor	
Draft shield	from the top	reduces interfering influences resulting from drafts
Guiding bars	available for all belt lengths	
Belt transition plates	available for all belt widths	closes the gaps between the belt bodies
Compressed air monitoring	stops the system when air pressure drops	
Software licenses	BRIDGE+MC_BUFFER VERIFIABLE_X1	For buffering data in the event of LAN / pc failure as per prepack regulations, incl. conformity assessment
