SPC21 Elix

BIZERBA

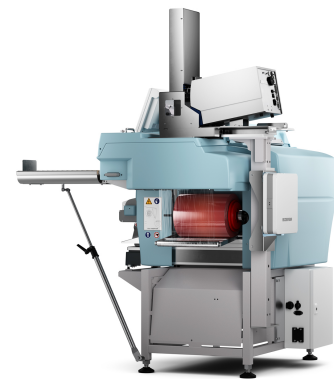

SPC21 Elix is the perfect solution for stretch film packaging with automatic price calculation. The integrated GLP KF kit with scale software RetailPowerScale offers an ideal in-store solution for weighing and labeling fresh food. The Elix 21 is part of the latest generation of automatic stretch film wrappers of the Elix series and stands out in terms of highest standards concerning safety, technology and cost-effectiveness. It completes the entire system SPC21 Elix which can be easily integrated in an existing retail infrastructure.

solutions and options.

Product description

Owing to its high packaging quality and productivity, the SPC21 Elix is ideally suitable for efficient packaging of fresh food such as meat, cold cuts, seafood, cheese, fruit and vegetables in the retail sector. The space-saving, fully automatic wrapper with integrated labeler is very flexible in terms of positioning, for example. In addition, the stretch film wrapper processes a wide range of packaging sizes and automatically adjusts the packaging parameters. The automatic applicator is designed in such a way that it can place the label without any restrictions on position. The visible overall result: an appealing product presentation.

Highlights

- Automatic recognition of package dimensions
- Intuitive operation based on the Bizerba scale software RetailPowerScale
- Perfect integration in retail management software infrastructure
- Quick and easy change of consumables
- Robust printer technology, proven in industrial environments
- Energy-efficient thanks to an electrical solution for wrapping and labeling

Options

- W-LAN (USB or BWLC)
- Saves up to 50 % energy with stand-by mode
- Up to 20 % less film thanks to Superstretch technology
- Details on printer and CPU explained in GLP KF kit
