Data Sheet

BRAIN2 Label_Designer

BIZERBA

Create professional label layouts for Bizerba labeling devices with the BRAIN2 Label_Designer. Due to a true to the original representation you can already see the result on the screen. Test prints in original size are made on your laser or inkjet printer.

More information
High performance with a wide range of solutions and options.

Product description

Customer labels with customized layout: The graphic user interface for easy design of labels is a WYSIWYG application which means that while editing the label on the screen, it is shown exactly as it looks like for output via a labeling device. True type fonts installed on a PC can be used in GX devices.

Properties

– Professional label design according to customer requirements
– Easy use of texts, logos and barcodes (such as QR codes or data matrix)
– Test prints in original size on your laser or inkjet printer
– Use of Unicode characters and TrueType fonts possible

Provable benefit

Via simple tools you can centrally design your individual labels, QR and data matrix codes on the PC. All fields such as logos and barcodes available in the weigh price labeling systems can be easily placed on your screen. Various templates for nutrition facts, GDA and other information help you to implement European Food Information Regulations.

Highlights

– Individual, central label design
– Designing and printing of 2D codes
– Supports the implementation of the European Food Information Regulations
– Printing of Unicode characters and other fonts
– Automatic database backups via BRAIN2
– Audit Trail
– Management of access rights
